The coolest fact about the magic rock is that it made superworld

The second coolest fact about the magic rock is that there's lots of things that it has made that have not been discovered yet. Superworld is the only thing the magic rock has made that has been discovered apart from ... On the 6th of November 1985 a scientist discovered another thing the magic rock had made the secret key (a living bean)

So the thing is that when people first came there it was not 100 explores in a ship finding secret whirlpool no it was three people finding a secret panting in an art gallery so they did not have an airplane there
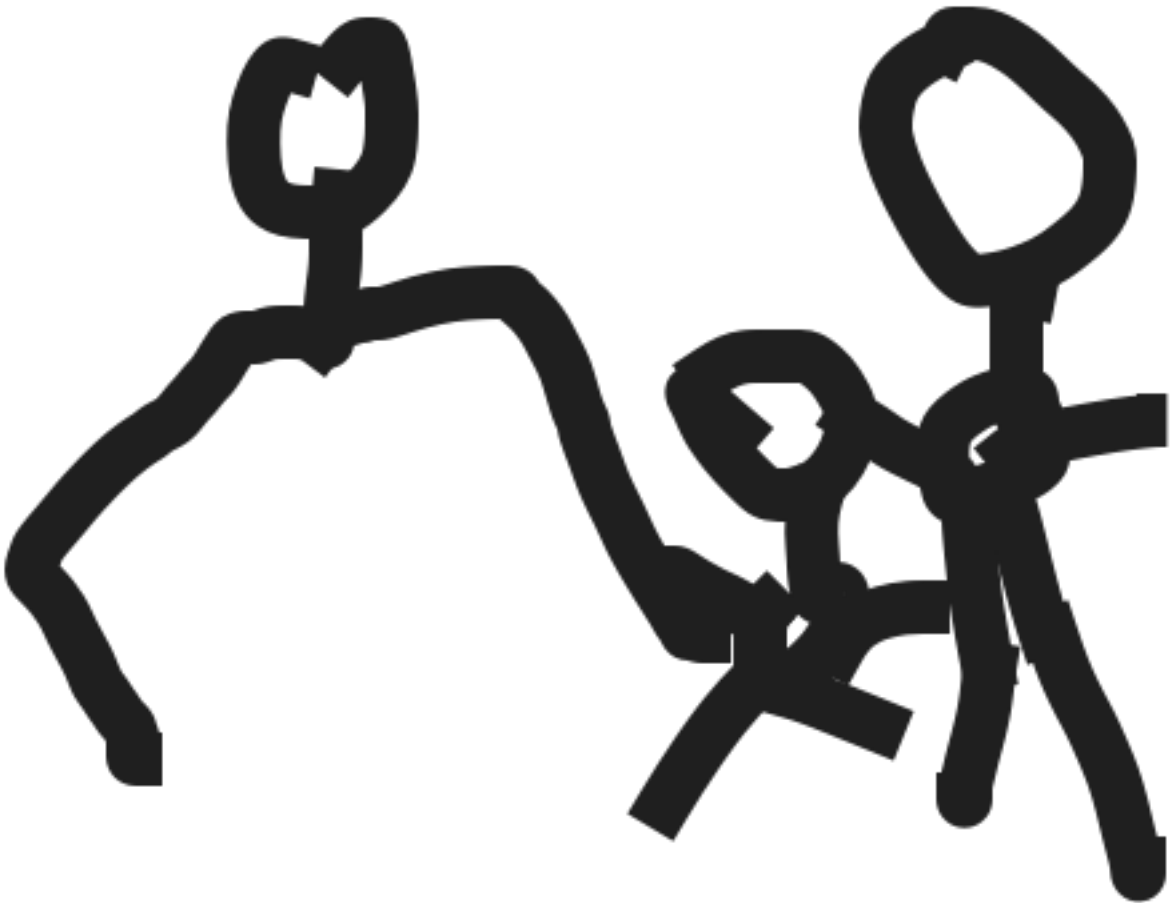

The thing that really got people to superworld is the tunnel that joins people to superworld (the panting is the start). If that was not real on one would get to superworld
